

Corporate Energy Policy

Applies To

This document applies to all 3M operations.

Introduction and Background or Purpose

3M will seek to both promote the efficient use of energy in our operations and to deliver products to our customers that help them save energy.

Requirements or Expectations

3M is committed to continual energy performance improvement and must ensure the following activities are completed in support of this policy:

- Emphasize energy performance in our existing operations, as a design factor in the construction of new facilities, and in the development of new products and manufacturing processes.
- Implement an effective energy management system that supports manufacturing capabilities while providing a safe and comfortable work environment with the information and resources needed to set and achieve appropriate energy objectives and targets.
- Secure adequate and reliable energy supplies at competitive rates and conduct appropriate contingency planning activities to protect operations from interruptions.
- Encourage continuous energy performance improvement by employees in their work and personal activities.
- Drive development and application of innovative energy efficiency technologies in our products and through our operations.
- Cooperate, when feasible, with governmental agencies, utility companies and other organizations on energy programs and comply with all legal requirements relating to energy use, consumption and efficiency.
- Report progress toward 3M's energy objectives and targets to executive management and external stakeholders on a regular basis.
